

# MP401 professional grade

## RoadRunner measuring wheels

### Metal Frame, Spoked Wheel

Simplicity and durability were two principles that guided our design. The result is a wheel that rolls easily over the most difficult terrain and can stand up to constant heavy use.

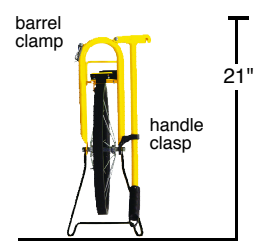

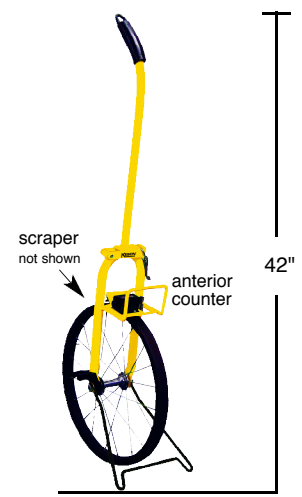

Whether you're rolling it down an asphalt road or using it for extreme environment estimations, the MP401 gets the measurements right.

5 digit counter. Up to 99,999 feet.

### Advantages

- Innovative, design—simple center-line functionality, no off-set anything, great balance
- Rugged 3/4" steel tubing—strongest in the field, and yet it's lighter than most
- Durable 3/8" rubber on the wheel preserves the integrity of the wheel's shape
- Time-tested and proven counters—huge numbers make for easy reading. Two moving parts (reset and ticker) mean fewer things can go wrong.
- Superior counter protection and placement—the scraper and steel shelf keep dirt and debris from coming into contact with the critical counter
- Compact fold-down—easily reduces to 1/2 its size for storage and portability. Barrel clamp and handle clasp make storage a snap.
- Ships and stored in boxes that take up 1/3 less space—get more on (and off!) your shelves
